

DERMULSENE RA 702

DERMULSENE RA 702 is an aqueous, solvent free resin based on stabilized rosin.

TYPICAL VALUE

Solid content, %	52
pH at 20°C	7.5
Brookfield viscosity at 20°C, 50 min ⁻¹ , mPa.s	800

DRT analytical methods are available on request

OTHER TECHNICAL DATA

DERMULSENE RA 702 gives good mechanical stability when properly formulated and handled.
The product is always packaged through 50 microns filter before shipment.

USES

DERMULSENE RA 702 is particularly recommended for pressure sensitive adhesive tape and label applications.
DERMULSENE RA 702 is specifically designed to tackify a wide range of acrylic, SBR and other water based synthetic or natural polymer.
This dispersion is useful for effective tackification with high shear performances.

IDENTIFIERS

Mixture - Waterborne dispersion of modified rosin

TRANSPORT

HANDLING & STORAGE	Keep from freezing, DERMULSENE RA 702 containing no freeze, thaw stabilizers, coagulates irreversibly upon freezing. Accordingly during the cold season, shipments and storage are to be made in insulated carriers and tanks. We also advise to avoid an extended storage at a temperature over 35°C. To prevent evaporation and subsequent formation of coarse particle, keep containers or drums closed.
STABILITY	Shelf life up to 18 months under previous conditions.
PACKAGING	DERMULSENE RA 702 is available in 1 MT container or road tankers.
CUSTOMS TARIFF	3806900000

TECHNICAL DATA SHEET / 26.03.19
