

Product Type:

2922 is a purified flake product manufactured using Superior Graphite’s proprietary electro-thermal purification technology. This continuous high-temperature process exposes the flake graphite to extremely high temperatures so that impurities, including inorganic contaminants, are sublimed. 2922 is the medium-coarse size grade of the 'Thermally Purified Flake' product line produced using Superior Graphite’s dedicated milling and screening technology. Main uses are increase in thermal & electrical conductivity, coefficient of friction reduction, and low gas diffusion property enhancement in high demanding applications.

Product Characteristics:

- High Purity
- High Crystallinity
- Defined Texture
- Well-Defined Particle Size Distribution

Main Properties

Carbon	%	>99.9
Ash	%	<0.1
Moisture	%	<0.5
Size	um	D50 = 55-65
ICP Iron	ppm	<150

General Information

Formula	Natural Graphite
Chemical Name	Purified Graphite Powder
CAS Nr	7782-42-5
RoHS	Certified
REACH	Exempted

Standard Packaging

50 lbs bags	50 bags/pallet
-------------	----------------
