

B 2410

PRODUCT INFORMATION

Description

Ba / Zn Liquid Stabilizer

Typical Properties

Appearance:	Clear Amber Liquid
Specific gravity at 20°C:	1.004 g/cm ³
Refractive Index at 20°C:	1.4970

Application

B-2410 is a highly efficient Ba/Zn liquid stabilizer with very good heat stability for use in flexible to semi-rigid PVC compounds. It is self-lubricating and can be used with or without additional lubricants.

B-2410 is designed for applications requiring excellent color hold under dynamic stress and is suitable for most production processes but especially for calendaring films.

B-2410 meets the highest requirements for static heat stability, process stability, and plate-out resistance at minimum use levels and stabilizer costs. It can be used for some clear applications but is better suited for pigmented and filled applications.

Recommended dosage: 2.0 to 3.5 phr, depending on application.

Food Packaging Approval

B-2410 may not be used for the manufacturing of food packaging materials.

Handling

A material safety data sheet for the handling of this product is available on request.

Storage

Storage at room temperature is recommended.
Liquid products may be affected by moisture and containers should be kept tightly closed.
